Work order 701208 has been established to cover the purchase of a spectronic 20 Colorimeter and necessary items for use in running phenol concentrations of plant effluent.

The reason for this purchase is the fact that Twin City Testing charges \$25.00 a sample, and since we must run tests of the plant effluent at regular intervals, we will save money, if we make our own tests.

The cost of the Colorimeter is \$590.00, which will be furnished in 30 days.

Kindly make all charges for this work to General Ledger Account 153-701208.

Very truly yours,

*T. E. Reilly*
